RMCHCS Laboratory receives full accreditation from the College of American Pathologists.

GALLUP, NEW MEXICO -Rehoboth McKinley Christian Health Care Services (RMCHCS) Laboratory has been awarded its reaccreditation from the College of American Pathologists. Based on the results of a recent on-site inspection as part of the CAP's Accreditation Programs. Recognized for rigorous and robust standards, CAP accreditation elevates quality and mitigates risk, an important way that laboratories can contribute to improved patient outcomes.

The Director, Christine Antonio, and staff were advised of this recognition and congratulated for the excellence of the services being provided. The Director, Christine Antonio, said, "I am so proud of my team. Their commitment to hard work has paid off."

Wayne, Gillis, RMCHCS CEO, said, "We are proud of our lab team and their dedication to safe, quality care. This achievement reflects our mission to continuously raise the bar for patient services."

During the CAP accreditation process, eight surveyors reviewed the laboratory's records, quality control procedures, and operational processes. The CAP surveyors also evaluated laboratory staff qualifications, equipment, facilities, and safety programs. These assessments help verify activities and reflect the latest best practices. By meeting CAP standards, which the Centers approve for Medicare and Medicaid Services (CMS), labs demonstrate compliance with Clinical Laboratory Improvement Amendments (CLIA) regulations.

The RMCHCS Laboratory Team is a dedicated group of professionals, some with up to 35 years of experience in the laboratory field. We are committed to RMCHCS and the community we serve. We maintain high standards to provide results that providers can trust.
